12-17-20
HPX – PMC meeting notes

Present:
Hartmut, Mikael, Gregor, Thomas, John

1.6 Release
Address pull requests
New executor could be added

Discussion about adopting C++ 17 in place of 14

Thomas thinks it should be used
It would attract more users than it would lose
John added that users can still use C++14 instead of 17

HK – not before the next release next month, maybe for version 2.0
suggests waiting for C++20
Should be for 2.0 version
Look into what version of C++ users are using to determine whether the change should be made

Mikael
New community survey next year
Merged GCC fix

Meetings will resume on 1/7/21
